

MICROSOFT STUDIO CREATION

New Insights

Ariadna Recasens

OVERVIEW

- Microsoft has decided to start a new film studio but lacks expertise in the field.
- In this project, we will explore different datasets obtained from 3 online databases of information related to film and provide insights to help Microsoft create top-ranking movies.

OUTLINE

- Business problem
- Data
- Methods
- Results
- Conclusions

BUSINESS PROBLEM

- Microsoft wants to explore the trend of creating original video content and has decided to create a new movie studio.
- Still, there is a complete lack of expertise in the field.
- This case study will provide actionable insights to help the head of Microsoft's new movie studio decide what type of films to create.

DATA

Datasets used for this project

- IMDB:

- [imdb.title.basics.csv.gz](#): 146144 entries with the following information: tconst, primary_title, original_title, start_year, runtime_minutes, genres.
- [imdb.title.ratings](#): 73856 entries with the following information: tconst, averagerating, numvotes.
- [imdb.name.basics.csv.gz](#): 606648 entries with the following information: nconst, primary_name, birth_year, death_year, primary_profession, known_for_titles
- [imdb.title.crew.csv.gz](#): 146144 entries with the following information: tconst, directors, writers.

- The Numbers:

- [tn.movie_budgets.csv.gz](#): 5782 entries with the following information: id, release_date, movie, production_budget, domestic_gross, worldwide_gross.

- Box Office Mojo

- [bom.movie_gross.csv.gz](#): 3387 entries with the following information: title, studio, domestic_gross, foreign_gross, year

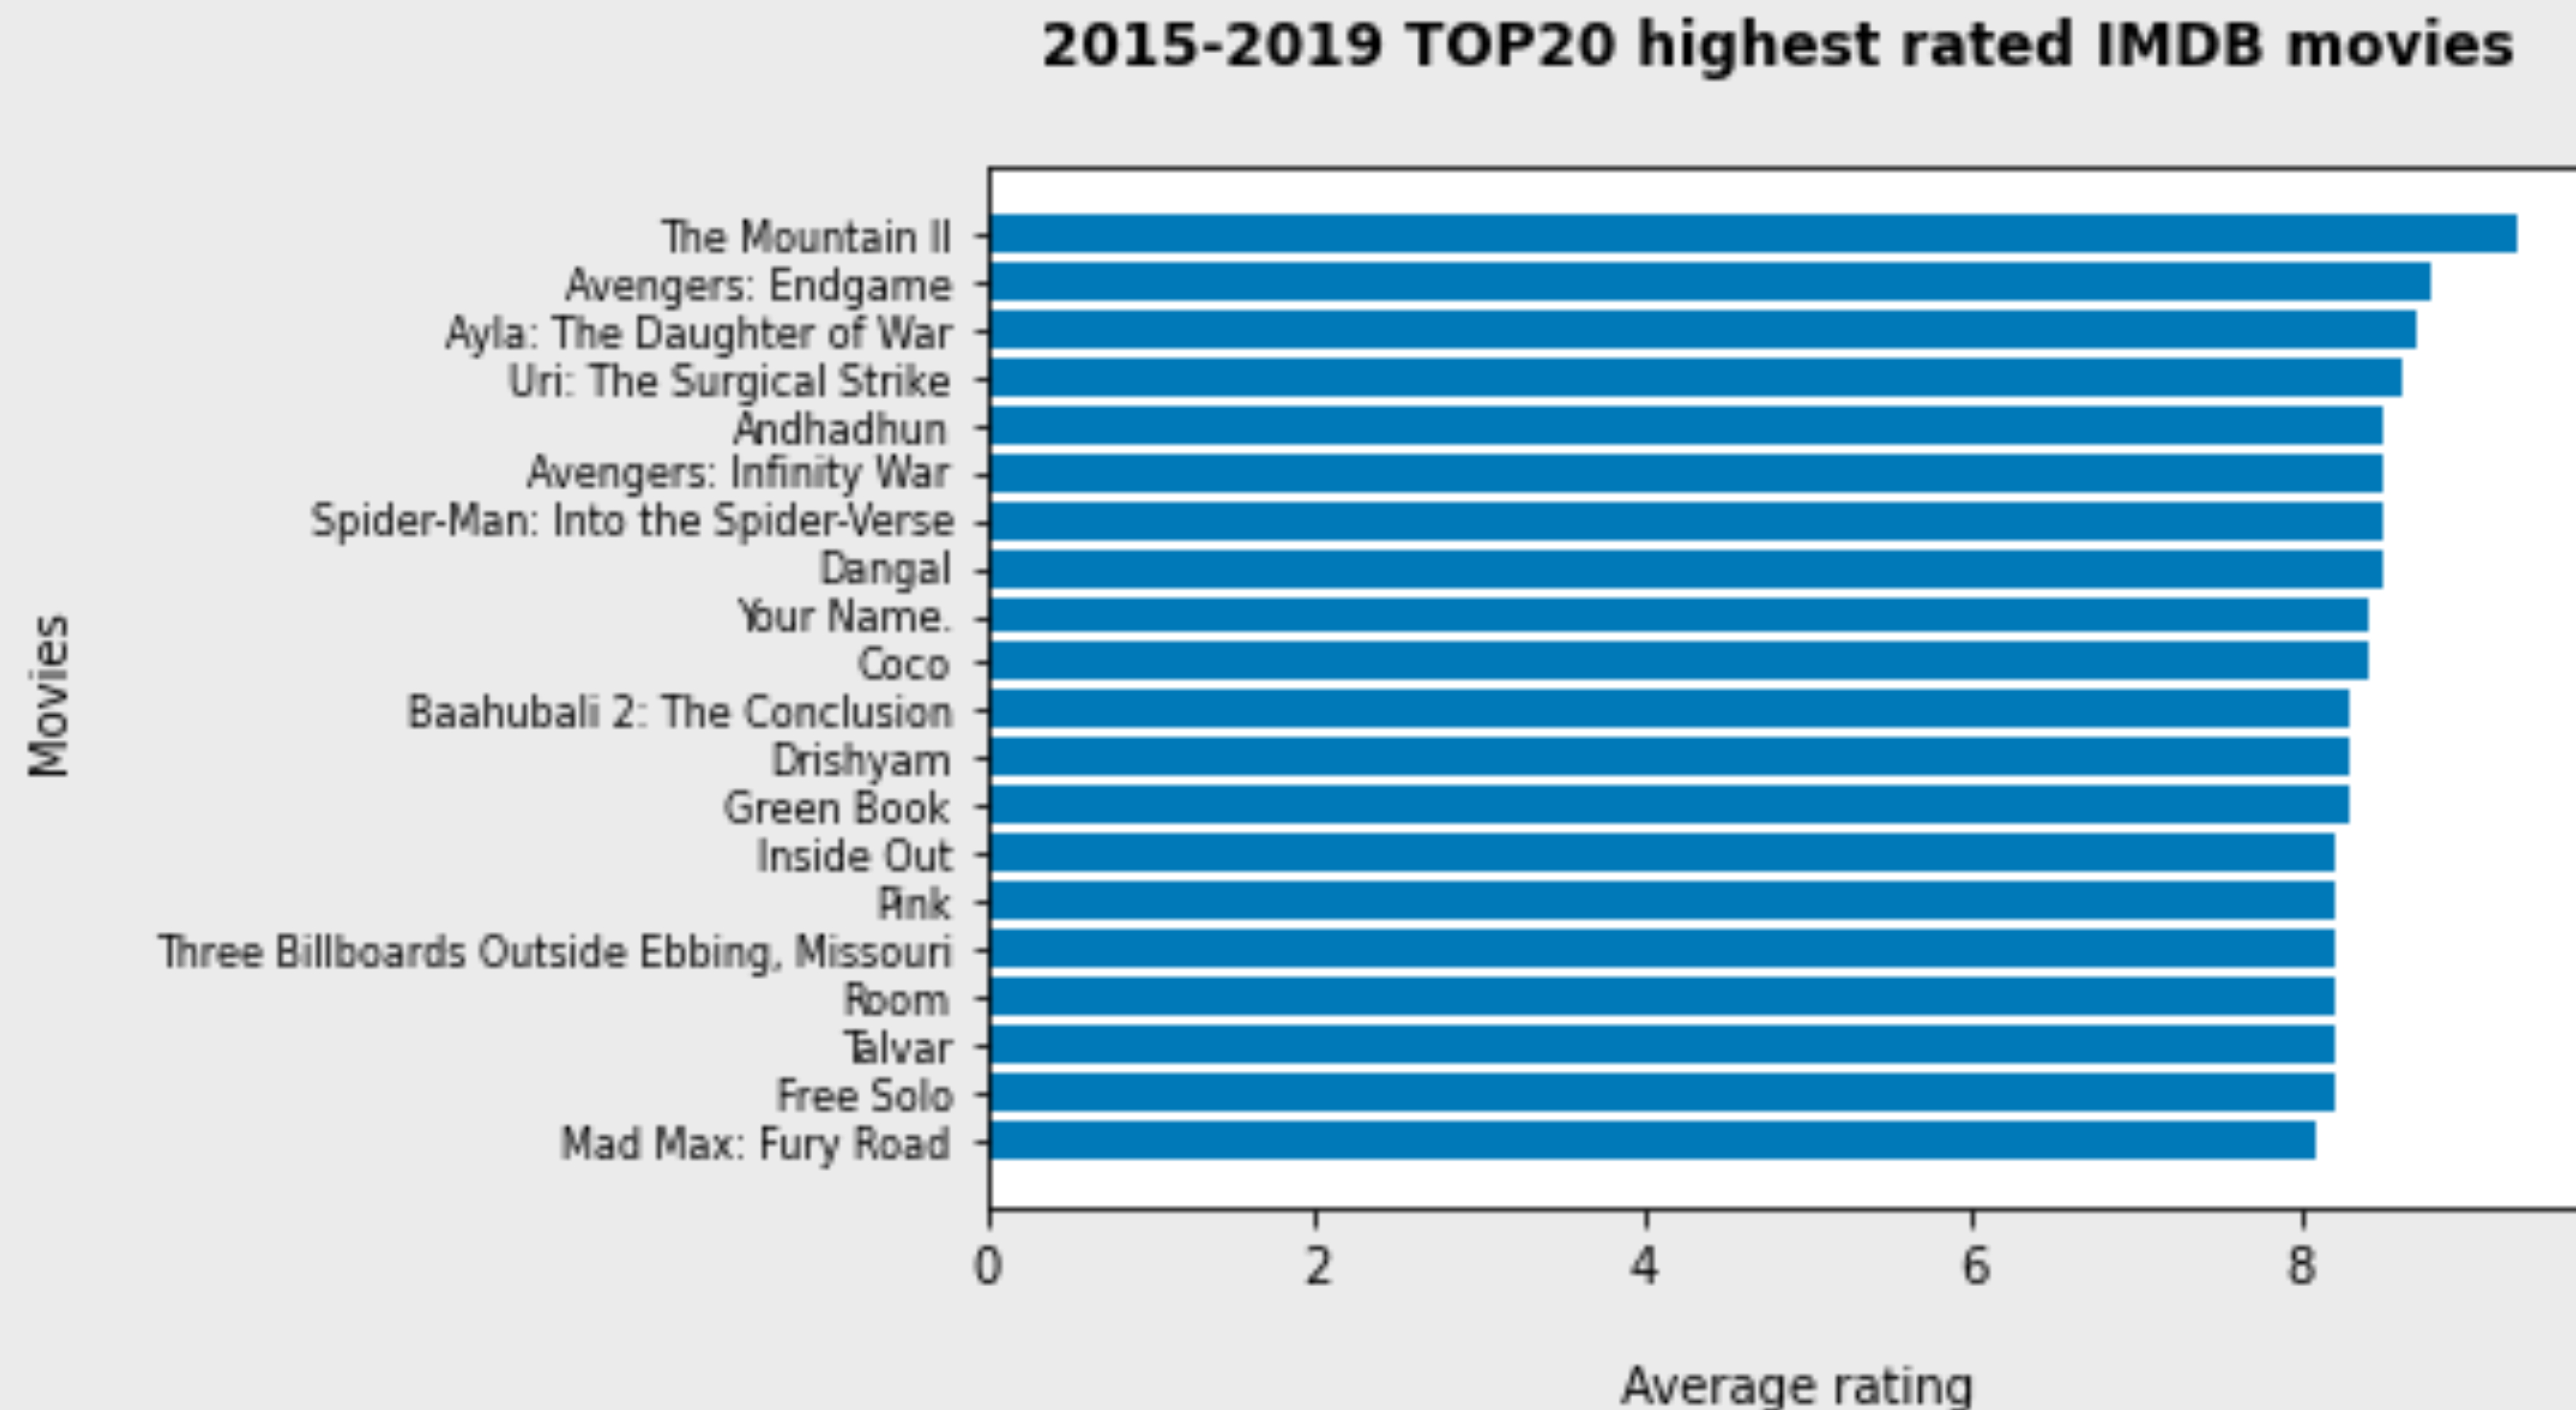

METHODS

Creation of Top 20 lists to explore what films are doing the best.

- **TOP 20 highest-rated IMDB movies:**
 - Recent movies: 2015 - 2019
 - At least 25,000 votes
- **TOP 20 highest-grossing movies:**
 - Recent movies: 2015 - 2019
 - Two lists: using BOM and TN datasets
 - Focus on total gross

Results
